Mink Lash Extensions

Faux mink eyelash extensions are the most popular extensions used by lash artists today. These, manmade, poly-fiber lashes come in a variety of lengths, diameters and curls, have good flexibility and remain somewhat natural looking depending on the length.

They're designed to imitate real mink fur, but lash artists and clients both love this of extension type because the curl is permanent and they're low maintenance.

No need to curl or put mascara on these types of extensions. The Faux Mink lashes are a little bolder, slightly glossier than the Silk and Mink. Because of their variety of size and length they're great for customizing different looks for each client.

Mink Volume 2D

Classic eyelash extensions simply mean where one lash extension is glued to one natural eyelash, this method is called 1:1 or one-to-one technique. Volume eyelash extensions are applied the same way, the difference is that one volume lash fan has multiple hairs in it.

Example if two lash extensions are applied to one natural lash then it is called 2D lashes, three lashes in one natural lash would be called 3D lashes, four lashes would be 4D lashes and five lashes would be 5D lashes.

Russian lashes are ultra-fine synthetic lashes that are made from the same soft fiber as classic lashes. Because they're much thinner, the therapist is able to apply more lashes to each natural lash - anything between 2-8. Russian lash extensions are applied in a fan-like shape, which gives more volume too.

Eyelash Refill

Your natural eyelashes continue to grow in a replenishing cycle. Since the extensions are bonded to your own natural lash, you may need to refill the areas where your own natural lash has fallen out. Touch-ups, will keep the lashes looking fresh and fuller.
