Perms

Create long-lasting curls, waves, or added texture while giving the hair more volume, body, and movement. Perms can make styling easier, enhance natural-looking fullness, and help your hairstyle hold its shape for longer.

Cold Perms

BY L'OREAL

Perms work by using chemicals to change hair texture, either creating waves or curls. Traditionally, a stylist will wrap hair in rods before putting perm lotion on to set the curl.

After letting the lotion sit, stylists rinse it out, dry hair as much as possible, and use a neutralizer to halt the perming process.

Men's Perms

"Perms for men are beneficial because they are low maintenance, but also because it gives men an opportunity to change their look without necessarily having to change their cut or color,"

Adds natural-looking texture, volume, and movement to the hair, making it easier to style and creating a fuller, more defined look.

A perm can also enhance your haircut, reduce the need for daily styling, and help hairstyles hold their shape for longer.

Mink Lash best seller!

Faux mink eyelash extensions are the most popular extensions used by lash artists today. These, manmade, poly-fiber lashes come in a variety of lengths, diameters and curls, have good flexibility and remain somewhat natural looking depending on the length.

They're designed to imitate real mink fur, but lash artists and clients both love this of extension type because the curl is permanent and they're low maintenance.

No need to curl or put mascara on these types of extensions. The Faux Mink lashes are a little bolder, slightly glossier than the Silk and Mink. Because of their variety of size and length they're great for customizing different looks for each client.

IDR 400,000

Mink Volume 2D

What is the difference between Classic and Volume? Classic eyelash extensions simply mean where one lash extension is glued to one natural eyelash, this method is called 1:1 or one-to-one technique. Volume eyelash extensions are applied the same way, the difference is that one volume lash fan has multiple hairs in it.

Example if two lash extensions are applied to one natural lash then it is called 2D lashes, three lashes in one natural lash would be called 3D lashes, four lashes would be 4D lashes and five lashes would be 5D lashes.

IDR 500,000

Mink Volume 3D - 6D

Mink Volume 3D-6D are ultra-fine synthetic lashes that are made from the same soft fiber as classic lashes.

Because they're much thinner, the therapist is able to apply more lashes to each natural lash – anything between 2-8. This lash extensions are applied in a fan-like shape, which gives more volume too.
